

Let their gut do the talking.

Gastric Alimetry™
A noninvasive test for
gastric conditions

Get clear answers, quicker.

Chronic gastric illness can be a complicated issue, with you having to try one treatment after another to get to the root of the patient's symptoms. Fortunately, the Gastric Alimetry™ test removes much of the guesswork, so you can skip the trial and error and recommend the best treatment from the start.

What is Gastric Alimetry™?

Carried out at our Functional Gut clinics in Manchester, Cambridge and London, the test records data from the patient's stomach to provide you with a clearer picture of what's happening in their gut.

Why refer your patients for the test?

Gastric Alimetry™ is a new way to find out what's really happening in the patient's gut. Not only does it help you correlate data to certain conditions. It provides a more satisfying experience for your patients.

Two clear benefits

1. Clearly identify the best treatment:

with rapid, objective data on gastric function to allow for a more certain and targeted management pathway.

2. Clearly explain symptoms to your patients:

thanks to a clearer diagnosis and plan for treating their condition.

Real-time data insights

Gastric Alimetry™ provides accurate clinical data on gastric function. It will give you new insights into the mechanisms driving symptoms.

Defining patient phenotypes and informing therapy, insights include:

- Frequency and stability of gastric electrical rhythms
- Meal-response profiles
- Amplitude of gastric contractions
- Validated symptom graphs
- Technical data on test quality

Gastric Alimetry™ in four steps

1. Hi-Res Gastric Mapping

A stretchable electrode array is placed on the skin of the stomach.

2. Real-Time Symptom Tracking

You'll be given a light meal, after which the patch will sense and record the activity in your stomach for up to four hours.

3. Cloud-Based Analysis

Data sent to the Alimetry Cloud™ and processed using advanced algorithms.

4. Actionable Results

Detailed report generated for you to download on demand with your own personal login. All HIPAA and GDPR compliant.

Where will the test take place?

You can refer your patients to any of our Functional Gut Clinics in Manchester, Cambridge and London. All house an expert team of gut specialists, along with the latest technology, training and research.

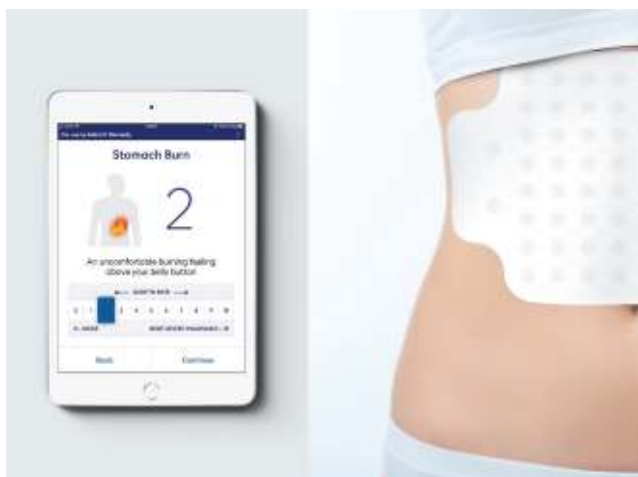

Breakthrough technology

Gastric Alimetry™ is based on a breakthrough diagnostic technology called 'body surface gastric mapping'.

Backed by evidence

The test is the result of over a decade of world-leading science, supported by a rapidly emerging evidence base across leading academic journals.
